# ECFH Group June 2014 Half Year Performance Review

## Chairman's Statement

During the first six months of 2014 the Board and Management of the ECFH Group continued to focus on stabilizing the Group's operations during what continued to be difficult domestic markets in Saint Lucia and Saint Vincent. There are encouraging signs of growth in the world's largest economies and the hope is that this growth can be sustained and begin to filter down to the small economies of the Region.

Good corporate governance forms the foundation of any successful business and work continued on implementing changes required towards ensuring that the Group and its subsidiaries achieve the highest possible standards in this area. The progress already made allows us to be confident that losses of the scale of those experienced by Bank of Saint Lucia Limited (BOSL) in recent years will not arise from new lending activities. The work on institutional strengthening and risk management improvements which commenced in 2013 have enhanced the collection and recovery processes in 2014 and this has led to a reduction in the pace of the re-classification of loans to non-performing status. Significant progress is also being made towards disposal of the largest of the non-performing loans which once complete, will result is significant improvement in the quality of the bank's assets.

The Group's Total Assets at June 2014 amounted to \$3,653M, compared to \$3,724M in December 2013. Depositor's funds have held steady, with growth in both domestic markets and resultant strong liquidity.

The Group is reporting a half year profit after tax of \$1.3M despite the critical review of the lending portfolio of BOSL resulting in some additional loan loss provisioning related to reducing property values. The total provisioning cost for the Group was \$15.3M. Operating costs reduced considerably, by 9% from \$53.6M to \$49.0M for the half year. This reduction is across the board in staff costs as well as other operating costs. BOSL's capital adequacy remains well within the regulatory requirement.

The Bank of St. Vincent and the Grenadines (BOSVG) performed well. The bank had very low levels of loan loss provisioning and improved interest income to increase its profit to \$4.1M, an increase of 23% over the first half of 2013.

Bank of Saint Lucia International Limited's half year profit of \$4.4M was a reduction of 12% compared to the first half of 2013, with the impact of lower interest rates being only partially compensated by increased fee income and reduced costs.

ECFH Global Investment Solutions Limited, the brokerage subsidiary, was able to turn its increased fee income into a 63% increase in profit.

The results for the first half of 2014 have shown signs of improvement however, in spite of this, the Board, in maintaining prudent management of the capital of the Group, has not declared an interim dividend. The Board is encouraged that the strategies implemented to turn the Group around are working. The strengthening of the banking subsidiaries remains a priority over the longer term and this includes the preservation of capital in the difficult economic climate.
